

***For Smoother,
Sexier Skin!***

PROFESSIONAL HAIR REMOVAL FOR EVERY PART OF YOUR BODY

Extensive scientific testing has proven Nufree® to be a self-preserving antibacterial, antimicrobial hair removal system, ensuring that Nufree is safe and effective. And because Nufree isn't a wax, you won't experience the pain and redness associated with wax-based products.

finipil®, our antiseptic lotion which is applied post hair removal, cools and protects the empty hair follicle between Nufree treatments. Nufree finipil is so gentle you can swim and tan immediately after your treatment.

Nufree treatments are only available at Nufree registered salons with licensed beauty professionals.

finipil®

Cooling & Soothing Antiseptic Lotion

Patented **finipil** is for application immediately after Nufree hair removal treatments and for continued at home use.

finipil destroys 99.999% of bacteria while keeping your empty hair follicle clean, protected and moisturized.

finipil cools the temperature of the empty follicle and reduces swelling due to hot showers or aerobic workouts.

finipil should be used daily on damp skin. This keeps the skin sanitary and the follicles clean and free of foreign matter.

finipil helps protect against ingrown hairs.

finipil is clinically tested and dermatologist certified.

finipil is an FDA registered OTC antiseptic.

***Purchase finipil from your salon!
Or order online at thebodyperfect.com***

Nufree® removes the entire hair!

Before a Nufree Treatment.

After a Nufree Treatment.

Hair follicle after Nufree®

(Notice the entire bulb and hair shaft removed.)

Hair follicle after other hair removals

shaving

chemical depilatories

waxing
